Hassan Tariq

SoftEng @ CUST '26 | Full Stack Engineer | Cloud-Native Intelligent Systems

Rawalpindi, Punjab, Pakistan

Summary

I enjoy building autonomous AI systems, streamlining end-to-end deployment pipelines, and exploring the evolving landscape of AI and cloud infrastructure.

- Programming & Automation: Python, Bash, Docker
- AI & Data: Agentic AI frameworks, ML Ops, PyTorch, RAG
- DevOps & Cloud: CI/CD pipelines, AWS / GCP, Azure

Experience

7thClub - White Label SEO Agency

10 months

Full Stack Engineer

April 2026 - Present (2 months)

Islāmābād, Pakistan

DevOps Engineer

August 2025 - April 2026 (9 months)

Islāmābād, Pakistan

Designing, implementing, and maintaining scalable infrastructure to support development and production environments. Manage CI/CD pipelines, automate deployments, and monitor system performance to ensure reliability and uptime. Collaborate with development teams to optimize workflows, enhance system security, and streamline software releases.

ISPR

Software Engineering Intern

July 2025 - August 2025 (2 months)

Rawalpindi

Worked on AI-powered solutions to enhance automation and data-driven decision-making. Developed and optimized machine learning models, handled data preprocessing, and collaborated with cross-functional teams to implement

intelligent systems. Gained hands-on experience with Python, TensorFlow/PyTorch, and real-world AI applications.

Education

Capital University of Science & Technology

Bachelor of Engineering - BE, Computer Software Engineering · (July 2022 - July 2026)
